

## **Testimonial**

**Lousie O'Sullivan**  
**Asthma and COPD**

**March 2015**

We are delighted with the SoeMac as it has really helped with my breathing. I have chronic asthma and the start of COPD. Some days are still better than others, but I have noticed the annoying coughing has become less and my breathing in the morning is much better. One day I even forgot to take my medication as my chest was so clear. To me it has made a great difference, and it is much better than having to take more medication.

**February 2015**

I am absolutely delighted with the SoeMac, and have felt a marked difference in my breathing and sleep.
